

# Child Welfare Digital Services Sprint Review Presentation

Sprint Review of Sprint 4.5 (Intake #29)  
Intake Development and TPT.1

*Sprint Dates: 10/19/17 to 11/01/17*

**CWDS** / Child Welfare Digital Services

- Minimum Viable Product (MVP) is the smallest increment of business parity for a complete workflow

# The present and future

*We are here*

**CHILD WELFARE HISTORY SNAPSHOT**  
**CONTACTS**

**MVP OF HOTLINE**

**MVP OF INVESTIGATIONS**

- Disposition
- Outcomes

**SUPERVISOR REVIEW**

**INTERFACES**

- SDM Tool
- Smarty Streets

**POTENTIAL ENHANCEMENTS**

- Genogram of relationships
- Timeline of child welfare history
- Improved search accuracy
- Duplicate reduction
- Criminal history integration
- Mental health integration
- Equitable workload distribution
- etc

- Minimum Viable Product (MVP)
- Structured Decision Making (SDM)

# What features did we deliver in this sprint?

- Get and display a person's race from CWS-CMS
- Display error messages for missing pages and system issues
- Investigations
  - Edit contacts and **save them in CWS-CMS!**
  - Log of all contacts
  - View existing contacts
  - Display history, relationships and allegations (just like a screening)

# What *else* did we accomplish in this sprint?

- Hardening Hotline and Snapshot for release
  - 12 bugs addressed
  - Secure access to Elasticsearch
- Design
  - Usability testing for Contacts
  - Dashboard for an investigator
  - Investigation disposition and outcomes
  - Edit and save animations

Demos!

# Contact - Investigation 0Qq3yMt0Hj

Edit

Date & Time  
(06/15/2010 12:00 AM)

Communication Method  
In person

Location  
Court

Status  
Scheduled

People present  
Perp 2 Mendonca , undefined  
Jane A Gilkison , undefined  
Non - Victim Champken , undefined

Purpose  
Deliver Service to Client

Contact Notes (Optional)  
6/15/2010 12AM (will this be 12AM in legacy? Daylight savings time?) In person, court, scheduled, Non-Victim and Perp 2 and Jane, Deliver service to client

**Client Services - Referral [Verification (R3)] - [Contact [06/15/2010 ]]**

Case Management Services/Referrals

Case Management Services/Referrals	Wraparound	Core Service

Wraparound  Core Service

Narrative

6/15/2010 12AM (will this be 12AM in legacy? Daylight savings time?) In person, court, scheduled, Non-Victim and Perp 2 and Jane, Deliver service to client

# Research & Design

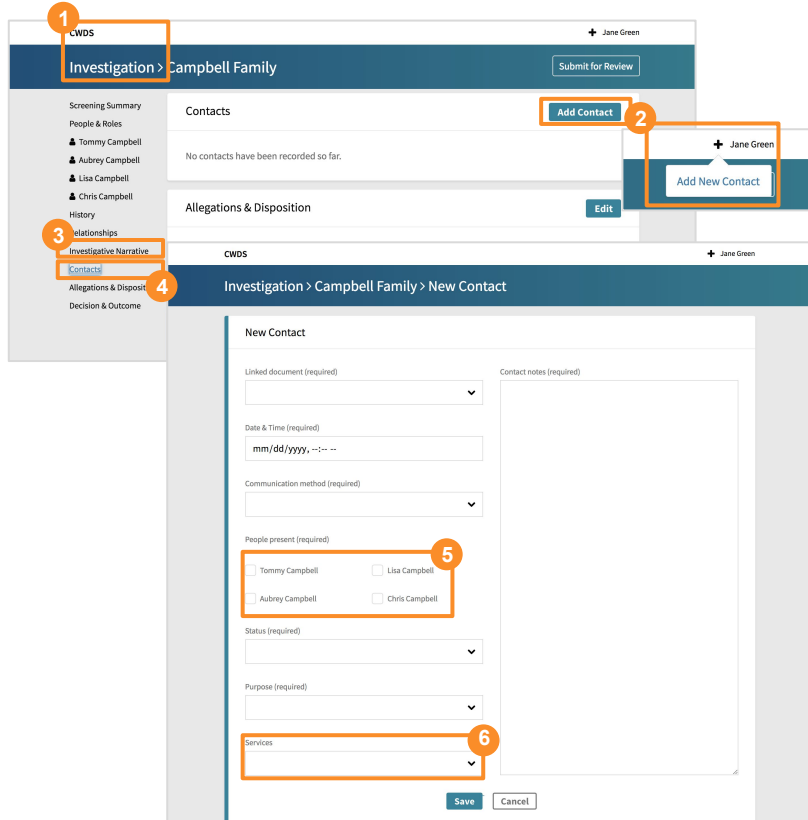

# Top Findings

Participants  
**23**

Tasks Tested  
**3**

Measures of  
Success/Struggle  
**92/16**

1. Participants from all but 2 counties struggled to navigate back to their dashboard
2. 22/23 participants were able to create a contact, but 8 struggled
  - A few participants tried to add a contact through the person card first
3. There was confusion between Inv. Narrative and Contact Notes
  - Investigative Narrative being directly above Contacts was questioned
  - In one county, an experienced inv. understood the difference while a new inv. did not
  - Difference between screening narrative was not clear
4. Anchor links on the left side of page were utilized frequently to move around the page on desktop and tablets
5. Participants did not know how to add a new collateral to a contact
6. Participants questioned the Services dropdown
  - Wanted to be able to select multiple services
  - Questioned if services should be in a contact at all
  - Questioned the “Provide Your Rights” brochure being in the list of services

\*\* One user with low vision had difficulty with the color contrast

# Recommendations & Notable Quotes

- Identify the purpose & placement of the Investigative Narrative (also, consider how this relates to the rationale and conclusion text fields...)
- Increase affordance of breadcrumb links (ie. make them look more click-able) so users know how to navigate back and forth in the app
- Explore other locations for the *Provide Your Rights* brochure
- Test contacts again with working app which include: updates to Services dropdown and the Location drop down.

## Notable Quotes

“Woooooo!! I like this though, the presentation of information flows and I don’t have to click another tab! Can I customize my own colors? When can I have the new system?”

“It seems logical in the way you have it laid out.”

“What’s the difference between contact and investigative narrative.”

# Conclusion

Overall, the test results supported the goals of the test: users successfully created, found and updated contacts.

The functionality of the prototype caused some issues with how smooth the test went and behaved in a way that was unexpected by the participants. Users primarily used the anchor link on the left side of the screen to navigate to the contacts card, but it was noted that some users that had time to explore, did see the “+” and thought they could create a new contact that way, others were unclear of the meaning of the “+”.

The test performed well on multiple devices resulting in successful task completion. There was some confusion around the Investigative Narrative and the Contact Notes. The proximity of Investigative Narrative to the Contacts card also raised significant questions.

A few participants wanted to initiate a contact through a person first, but the majority of participants expected to return to the investigation page from the contact screen. Due to a prototype bug, users did not see the location selection method. This was an issue by many participants.

	<b>YES</b>	<b>NO</b>
Were test goals met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	<b>YES</b>	<b>NO</b>
Further research or testing needed?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Next Steps:

- Share findings
- Update the test packet to address issues observed in testing
- Execute recommendations into development cycle

## Retro:

- If making changes to the test plan, a pilot test should be considered
- Make sure prototype functions as expected and note as many bugs as possible upfront.

# Code Metrics

Tests run at latest CI run for Intake	2,700
Code coverage for Javascript	97.06%
Code coverage for Ruby	99.61%
CI Runs	559

# Sprint Metrics, Improvements & Challenges

# Impediments

## Team Control

## Team Influence

## Organizational

- QA Black box testing (automation) as part of “Definition of Done” will require more time per story (In progress)
- Access to data in legacy system limited email chain with performance analyst in another team. (In progress)
- Coordinating with both TPT.1 and TPT.2 now for authorization and search related stories. (In progress)

- Testing environments being used for demos, forcing delays to code updates and leaving less time for testing (in progress)
- Unclear demo schedule disrupting developer work mid-sprint to do unplanned support work

- Low Impact
- Medium Impact
- High Impact

# Intake Development
